Suggestion Text:

Agency: Administration, Dept of (DOA)

Suggestion Stage: New

Suggestion #: [DOC-2011-7](#)

Suggestion Subject: energy savings

Suggestion Content: My suggestion is that the state install programmable thermostats in all state office buildings in the state. Programmable thermostats would allow building temperature to be raised or lowered to conserve energy when they are not occupied such as on weekends and after regular working hours. There are many state offices that do not have any occupants after 5 p.m. and on weekends and there is no need to keep temperatures the same 24 hours a day with the cost of electricity.

What happens to a suggestion when submitted?

- ❖ The state coordinator and agency coordinator review the suggestion on NCThinks website to determine feasibility. The agency coordinator then forwards all feasible suggestions to proper state agencies/committees for further evaluation.
- ❖ If evaluators find it feasible, the suggestion can then be put on trial for a year. *(A bill in the legislature may give us more leeway with the time frame.)*
- ❖ If the suggestion saves money after the year-long trial, the suggestion is sent to the State Review Committee for review.
